

**UNAUDITED PRO FORMA FINANCIAL EFFECTS RELATING TO THE RESTRUCTURE PLAN BY ATLATSA AND WITHDRAWAL OF EXISTING CAUTIONARY ANNOUNCEMENT**

**March 28, 2013** Shareholders of Atlatsa Resources Corporation (“Atlatsa” or the “Company”) (TSXV: ATL; NYSE MKT: ATL; JSE: ATL) are referred to the announcements released from February 2, 2012, to March 27, 2013 respectively, relating to the agreement of key terms in respect of a transaction to restructure, recapitalize and refinance Atlatsa and Bokoni Platinum Holdings Proprietary Limited (“Holdco”) and all of its subsidiaries (“the Bokoni group”) (the “Restructure Plan”), as well as the media releases on September 27, 2012 and October 2, 2012 relating to the conclusion of the interim implementation agreement relating to the consolidation of the Bokoni group debt and consequent reduction in its cost of borrowing (“ phase one of the Revised Restructure Plan”).

UNAUDITED PRO FORMA FINANCIAL EFFECTS RELATING TO THE RESTRUCTURE PLAN

The table below sets out the unaudited pro forma financial effects of the Revised Restructure Plan on the audited financial statements for Atlatsa for the year ended December 31, 2012. The unaudited pro forma financial effects have been prepared for illustrative purposes only, to provide information about how the Revised Restructure Plan might have affected the reported financial information had the Revised Restructure Plan been undertaken on January 1, 2012 for the statement of comprehensive income and on December 31, 2012 for the statement of financial position purposes. Due to its nature, the pro forma financial information may not present a fair reflection of the financial position, changes in equity, results of operations or cash flows of Atlatsa after the Revised Restructure Plan.

The directors of the Company are responsible for the compilation, contents and preparation of the unaudited pro forma financial effects of Revised Restructure Plan. Their responsibility includes determining that the unaudited pro forma financial effects have been properly compiled on the basis stated, and that it is consistent with the accounting policies of Atlatsa and that the pro forma adjustments are appropriate for the purposes of the unaudited pro forma financial effects disclosed pursuant to the Listings Requirements of the JSE.

The unaudited pro forma financial information of Atlatsa has been prepared using the accounting policies that comply with International Financial Reporting Standards and that are consistent with those applied in the preparation of the audited consolidated financial statements of Atlatsa for the year ended December 31, 2012.

The Consolidated Debt Facility (The amendment of the Senior Term Loan Facilities Agreement dated June 12, 2009 between Plateau as borrower, and RPM as lender to increase the total amount available to repay the Operating Cash Shortfall Facility and redeem the A Preference Share Facility that was outstanding in the capital of each of Plateau, Holdco and Bokoni Platinum Mines Proprietary Limited at September 28, 2012) attracts a below market related interest rate during the initial terms. Subsequent to initial recognition these financial liabilities are measured at amortised cost using the effective interest method. As a result, a fair value gain on the initial recognition of the new debt is recognized (difference between the fair value of the debt and its face value) on the assumption that a market related interest rate is 3 month JIBAR plus 8 %.

#### CIRCULAR AND SALIENT DATES AND TIMES RELATING TO THE RESTRUCTURE PLAN

#### Cautionary and forward-looking information

This document contains "forward-looking statements" that were based on Atlatsa's expectations, estimates and projections as of the dates as of which those statements were made, including statements relating to the Bokoni Group restructure and refinancing and anticipated financial or operational performance. Generally, these forward-looking statements can be identified by the use of forward-looking terminology such as "may", "will", "outlook", "anticipate", "project", "target", "believe", "estimate", "expect", "intend", "should" and similar expressions.

Atlatsa believes that such forward-looking statements are based on material factors and reasonable assumptions, including the following assumptions: the Bokoni Mine will increase or continue to achieve production levels similar to previous years; the Ga-Phasha, Boikgantsho, Kwanda and Platreef Projects exploration results will continue to be positive; contracted parties provide goods and/or services on the agreed timeframes; equipment necessary for construction and development is available as scheduled and does not incur unforeseen breakdowns; no material labour slowdowns or strikes are incurred; plant and equipment functions as specified; geological or financial parameters do not necessitate future mine plan changes; and no geological or technical problems occur.

Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause the Company's actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward-looking statements. These include but are not limited to:

- uncertainties related to the completion of the Bokoni Group restructure and refinancing;
- uncertainties and costs related to the Company's exploration and development activities, such as those associated with determining whether mineral resources or reserves exist on a property;
- uncertainties related to feasibility studies that provide estimates of expected or anticipated costs, expenditures and economic returns from a mining project;
- uncertainties related to expected production rates, timing of production and the cash and total costs of production and milling;

- uncertainties related to the ability to obtain necessary licenses, permits, electricity, surface rights and title for development projects;
- operating and technical difficulties in connection with mining development activities;
- uncertainties related to the accuracy of our mineral reserve and mineral resource estimates and our estimates of future production and future cash and total costs of production, and the geotechnical or hydrogeological nature of ore deposits, and diminishing quantities or grades of mineral reserves;
- uncertainties related to unexpected judicial or regulatory proceedings;
- changes in, and the effects of, the laws, regulations and government policies affecting our mining operations, particularly laws, regulations and policies relating to:
  - mine expansions, environmental protection and associated compliance costs arising from exploration, mine development, mine operations and mine closures;
  - expected effective future tax rates in jurisdictions in which our operations are located;
  - the protection of the health and safety of mine workers; and
  - mineral rights ownership in countries where our mineral deposits are located, including the effect of the Mineral and Petroleum Resources Development Act (South Africa);
- changes in general economic conditions, the financial markets and in the demand and market price for gold, copper and other minerals and commodities, such as diesel fuel, coal, petroleum coke, steel, concrete, electricity and other forms of energy, mining equipment, and fluctuations in exchange rates, particularly with respect to the value of the U.S. dollar, Canadian dollar and South African rand;
- unusual or unexpected formation, cave-ins, flooding, pressures, and precious metals losses (and the risk of inadequate insurance or inability to obtain insurance to cover these risks);
- changes in accounting policies and methods we use to report our financial condition, including uncertainties associated with critical accounting assumptions and estimates; environmental issues and liabilities associated with mining including processing and stock piling ore;
- geopolitical uncertainty and political and economic instability in countries which we operate; and
- labour strikes, work stoppages, or other interruptions to, or difficulties in, the employment of labour in markets in which we operate mines, or environmental hazards, industrial accidents or other events or occurrences, including third party interference that interrupt the production of minerals in our mines.
